

“Together at Last”

Stainless Steel and
Nickel Alloy Plate Plus
Stainless Steel Round Bar

The “Heavyweight in Plate,”
Sandmeyer Steel Company now
stocks Stainless Steel Round Bar

Already recognized as North America’s leading provider of stainless steel and nickel alloy plate products, boasting over 15 million pounds of plate inventory, covering 24 grades and 35 thicknesses, Sandmeyer Steel Company can also provide you with a complete line of stainless steel round bar in diameters 3/8” thru 7”, including PRODEC® quality bar. This allows you to combine your plate and bar needs on one single purchase order.

Sandmeyer’s tradition of exceptional service, consistent quality, fast turnaround times, and dependable deliveries extends to stainless steel round bar also, thus enabling Sandmeyer Steel Company to meet your most demanding needs in plate and bar.

Value Added Processing

The value added plate processing capabilities that have serviced thousands of customers for over 50 years can now be combined with stainless steel bar in either full lengths or cut to your specific sizes.

Applications

Stainless steel round bar is used in a variety of applications such as:

- Chemical and Petrochemical Processing
- Pulp and Paper Equipment
- Food and Beverage Processing
- Machining of Valves, Fittings, and Other Components
