## SANDMEYER STEEL COMPANY Adds Quickmill Annihilator<sup>®</sup> Machining Center

To Handle Your Toughest Stainless Steel and Nickel Alloy  
Tubesheet and Baffle Drilling Requirements

The Quickmill Annihilator<sup>®</sup> Machining Center is not your run-of-the-mill drilling center, but when has Sandmeyer Steel Company ever been content with “just good enough” when it comes to investing capital in our in-house processing capabilities?

With **rapid rate speeds** our Quickmill Annihilator<sup>®</sup> will chew through even the biggest workload with time to spare, assuring our customers **on-time, cost-effective deliveries.**

We can offer **drilled tubesheets and baffles up to 95" OD (2413mm) with hole size to customer specifications**, and we can even supply your holes with **expansion grooves!**

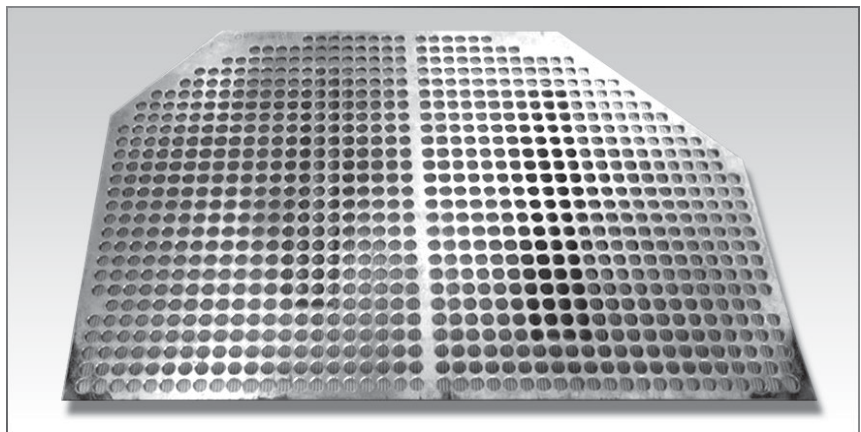

Sandmeyer Steel Company can offer single piece drilling through our standard stock thicknesses up to 6" (152.4 mm) or stacked drilled baffle pieces for an **economical product with one-stop shopping.**

All pieces will be produced to our customers' exact specifications with the accuracy you've come to expect from Sandmeyer Steel Company—the industry leader in value-added plate products.

With over **9,000 tons of stainless steel and nickel alloy plate in stock**, make Sandmeyer your one-stop source for drilled tubesheets and baffles!

After all, at Sandmeyer Steel Company—*“We know the drill!”*
